The following is an examiner's statement of reasons for indicating allowance of claim 23: The prior art teaches a stack of material sheets comprising material sheets having a longitudinal direction and a transverse direction, each of said material sheets being folded at least once in said transverse direction along a transverse folding line and at least once in said longitudinal direction along a longitudinal folding line; but does not disclose that each of said material sheets comprising g rectangular panels having a single material sheet thickness and having two delimiting edges formed from said at least one longitudinal fold line and said at least one transverse fold line; consecutive material sheets in said stack being folded into one another and interlinked by said panels. This feature in combination with the rest of the claim limitations is not anticipated or rendered obvious by the prior art of record.

The following is an examiner's statement of reasons for indicating allowance of claim 19: The prior art does not disclose a method of producing a stack of material sheets, which comprises applying a first web of adjacent individual material sheets to a second web of adjacent individual material sheets so that a longitudinal part of said first web overlaps a longitudinal part of said second web and so that a first material sheet in said first web overlaps a first material sheet in said second web with a panel of the respective material sheets; said panel comprising a rectangle delimited by a longitudinal folding line and a transverse folding line, and a next step of folding said second web on a first longitudinal folding line so that said second web material sheets of said second

web enclose a part of said first web material sheets. This feature in combination with the rest of the claim limitations is not anticipated or rendered obvious by the prior art of record.
